PTC17020 AQEA - prePC-DRAFT.DOCX

DJ,

A Statement of Basis (SOB) would be developed prior to issuance of a TV operating permit for the facility (which would be a ways down the road, if the project gets that far).

We have drafted an Air Quality Effects Analysis (AQEA) “attached”; which I believe may be similar to the technical requirements document (TRD) that you requested.

Feel free to give me a call if you had something else in mind or wanted to discuss.

David

CAUTION: This email originated from an outside source. Do not click links or open attachments unless you know they are safe.

David,

Is there a SOB/TRD for this or is it just the applications.

Patrick and DJ,

I have attached the current state of the in progress draft permit for Meridian Energy Group, Inc – Davis Refinery. This is the same copy NDDH AQ sent to the company for their review. (See email below for details)

Please reach out with any input upon review or if you have any questions.

Thanks,

David Stroh

Subject: Meridian - Davis Refinery prePC-draft AQ PTC

Mr. Williams,

Attached for review and comment is a pre-draft permit to construct for the Meridian Energy Group, Inc. – Davis Refinery. The attached pre-draft is based off the North Dakota Department of Health's review and understanding of the air quality permit to construct applications and additional information submitted to the Department (e.g. original in October 2016, amended in April 2017, and supporting information in June 2017).

At this stage in our review process, it is typical for the Department to reach out to the permittee to review the pre-draft permit to construct prior to publishing the official draft for public review and comment. This gives you the opportunity to review the permit language that you will be held to upon issuance of a final permit to construct.

Once your team has reviewed the pre-draft and provided questions/comments/suggested edits, the Department will take these into consideration before issuing a final draft for public comment and proceeding with the public hearing. Upon conclusion of the public comment period, the Department will review and respond to all applicable comments on the draft permit to construct before a final determination is made.

If you have any questions or comments on this process, feel free to reach out and let the Department know.

Thanks,

David Stroh
